

Upgrade Example: GALAXY® / TUBOLAVAR®

- Modification of existing under liquor bleaching system (pad steam instead of hypochloride):
Installation of demineralization system
Advantages: - Reduction of chemical consumption by 20-30%
- Reduction of waste water problems
- Perfect bleaching qualities
- Other modifications:
Installation of automated pH measuring and control system
Installation of width control system e.g. for exact body width dimensions
Installation of fully automated dosing system
