

Upgrade Example: SUPRAFLOR®

- Installation of an inclined bottom in the washing trough
Advantages: - Reduction of liquor ratio (saving of water and steam)
- Production of smaller lots at improved consumption rates
- Installation of all frequency controlled drives
Advantages: - Fabric-specific speed control of expander roller
- Flexible speed control of plater
- Wear-free system
- Other modifications:
Installation of automated pH-measuring and control system
Installation of fully automated dosing system
Optimization of liquor application system „Unicolor“
Installation of vacuum suction system
